DETAILED ACTION

1. Applicants' Response to Office Action, received 21 November 2008, is acknowledged. Claims 1, 34 and 61 have been amended.
2. Claims 1-6, 8-22 and 34-63 are pending and under consideration.

Rejections Withdrawn

3. The rejection of claims 1-6, 8-22 and 34-63 under 35 U.S.C. 112, second paragraph, as being indefinite for identity of immune response, is withdrawn in light of the amendment of the claims.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 2-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims depend from claim 1. Claim 1 is drawn to a conjugate comprising a synthetic homopolymer of γ PGA polypeptide covalently linked to a carrier. Claims 2 and 3 recite "The conjugate of claim 1", wherein the conjugate comprises "a" γ PGA polypeptide comprising 5-20 glutamic acid residues. Claim 4 recites "The conjugate of claim 1", whereing the conjugate comprises "a" decameric γ PGA polypeptide.

The use of the descriptive "a" γ PGA polypeptide in the claims instead of "the γ PGA polypeptide of claim 1" renders the claims indefinite because it is not clear if the γ PGA polypeptide in claims 2-4 are the same as the synthetic homopolymer of γ PGA polypeptide in claim 1.

6. Claims 8-22, 50-53, 57, 58, 62 and 63 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims depend from claim 1. Claim 1 is drawn to a conjugate comprising a "synthetic homopolymer of γ PGA polypeptide" covalently linked to a carrier.

None of the dependent claims recite "the synthetic homopolymer of γ PGA polypeptide", but recite "the γ PGA polypeptide". Thus, it is unclear if the recitations in these claims is directed to the "synthetic homopolymer of γ PGA polypeptide" of claim 1.

Conclusion

7. Claims 2-4, 8-22, 50-53, 57, 58, 62 and 63 are rejected.
